

Price $f(x)$

Release '1.6'

Release Notes

Go-live date:

2012-04-15

1. New features & Changes

- **Enhancements of the PriceBuilder module**
 - Ability to maintain dates as price attributes in proper date format in product and customer master as well as pricing parameters and use those dates for any calculations purposes in the pricing logic
 - Allow to restrict values for product and customer attributes and pricing parameters to a user defined list of values
 - Allow to set default values for selected pricing parameters in the pricing logic
- **Enhancements of the simulation within the PriceBuilder module**
 - Display a configurable summary of the simulation results
 - Manual override of the result price (e.g. List Price) in the simulation
 - Direct conversion of the simulation into a final price list
 - Ability to combine various single simulations (e.g. for different product groups) into one "Master"-simulation (e.g. all product groups)
- **Enhancements of the PriceShop module**

Ability to format the output fields as text, percentage or numbers (incl. currency)
